# Changing the Standard of Care for Breast Tumor Localization

Cianna Medical believes women deserve better when it comes to breast cancer care. That's why we created the SAVI SCOUT® Radar Localization System, a zero-radiation and wire-free solution designed to aid surgeons in locating target tissue during a lumpectomy.

SCOUT® is a highly sophisticated technology capable of delivering unparalleled performance.

- Precise and Efficient
- Intelligent (will only detect a unique radar signal)
- Resolution within 1 mm
- Highly directional
- Ultrasound visible and insignificant MRI artifact
- No signal interference from other surgical instruments
